

Cut on thick lines - Fold on thin lines

1. Have your parents or someone older help you cut out & fold your blockz & squares.
2. Cut out and save the orange weight squares.
3. You will need to glue or tape the orange weight squares to the back of each of the 6 block panels after you cut them out & before you fold & tape your block together to form a cube.
4. The weight squares allow your blocks to flip correctly when you toss them.
